

# GRAIN HANDLING STORAGE AND DRYING SYSTEMS

RELIABLE, ECONOMICAL AND IDEAL SOLUTIONS

[www.evasilo.com](http://www.evasilo.com)

# COMPANY PROFILE

## About Us

EVA Grain Storage Systems has been established by Bora Daglioglu. He has experiences more than 12 years in this market. He finalized many projects in Turkey and in more than 30 countries out of Turkey. We work about Grain Storage Systems, Grain Handling Equipments, Steel Construction Works, Grain Dryers and Grain Coolers, Temperature Monitoring systems, Meal and Ash storage bins, Grain Quality Analyze devices, Air Cannons for bins and Dust Collection Systems. We also serve Project Consultancy and Engineering jobs for above subjects.

### Why We Are Different.

- We serve right solutions by our strong experiences.
- We have very excited team who are very happy while they are doing their job.
- Delivery on time.
- To work As a solution partner.
- Our power comes from our solution partners and you; we look forward very clear.
- You can reach us for your further investment projects.

# INDEX

- 3 - Flat Bottom Grain Storage Bins
- 7 - Hopper Bottom Grain Storage Bins
- 11 - Meal and Ash Storage Bins
- 13 - Bucket Elevators
- 15 - Chain Conveyors
- 17 - Belt Conveyors
- 19 - Screw Conveyors
- 20 - Grain Flow Systems-Spouting
- 21 - Steel Constructions
- 23 - Grain Drying Systems (SUKUP)
- 25 - Grain Drying Systems (LAW)
- 26 - Grain Cooling Systems (FRIGOR TEC)
- 27 - Temperature Control and Monitoring Systems (ITG)
- 28 - Air Cannons for Bridge problems in Bins
- 29 - Dust Collection Systems
- 29 - Automatic Sampling Probes
- 30 - Grain, Flour, Feed and Food Quality Control Devices (PERTEN)

# FLAT BOTTOM GRAIN STORAGE BINS

Flat bottom bins are suitable for storing all types of grains.

Bins can be from 350 to 600 gr/m<sup>2</sup> galvanized coating in the range of 3.5 - 32 m diameters in line with customer needs.

Sealants against water are used in bin sheets.

ANSI / ASAE, DIN or EUROCODE bin designs can be made in line with customer requests.

Wind, Snow and Seismic loads should be taken into the consideration when installing the plant

## Standard Accessories in Bins;

- Standard Aeration Systems
- Complex Ground Ventilation for Oil Seeds and Better Ventilation Requirements
- Temperature Monitoring Systems
- Screw type Sweep Augers
- Aeration Vents
- Roof Exhaust Fans
- Internal, External and Roof Ladders
- Wind Ring
- Free Flow Side Discharges
- Service Platforms

# HOPPER BOTTOM GRAIN STORAGE BINS

▶ Hopper bottom bins are suitable for storing all types of grains but they are preferred for special requirements because of its high costs.

## Usage Places:

- Pulse storage
- Wet grain storage in drying plants
- Daily grain storage in factories
- First-in first-out product requires sensitive product storage
- To use as a Dosing Bin

Bins can be from 350 to 600 gr/m<sup>2</sup> galvanized coating in the range of 3.5 - 14.5 m diameters in line with customer requirements.

Sealants against water are used in silo sheets.

ANSI / ASAE, DIN or EUROCODE silo designs can be made in line with customer requests.

Wind, Snow and Seismic loads should be taken into the consideration when installing the plant.

## Standard Accessories in Hopper Bins;

- Standard Aeration Systems
- Temperature Monitoring Systems
- Aeration Vents
- Roof Exhaust Fans
- Internal, External and Roof Ladders
- Wind Rings
- Service Platforms

- The maximum capacities of the Bins are based on 800 kg/m<sup>3</sup> (wheat) density Calculated with %6 compression ratio.
- Above given Capacities may be different depending on the product to be stored, its physiological properties, moisture content, product densities, etc
- EVA Grain Storage Systems LLC reserves the right to change design and specifications without prior notice.

# MEAL AND ASH BINS

▶ Low Density products such as meal and ash cannot be stored in standard corrugated steel Bins because of their low-fluidity specifications. It can be stored in welded cylindrical Bins, but the capacity ranges of such Bins are very limited.

It is possible to store up to 1000 cubic meters of volume with special application Bins with plug-in type. They have a wide angled hopper bottom design. Conical angle is at least 67 degrees. The following accessories are required for proper flow in these Bins.

- Air Cannon Systems (Details on Page 28)

The Air Cannons Systems are air blasted and streamed by means of air cylinders connected to the bin with special nozzles entering inside the bin.

The control panel is compatible with your PLC system.

- Multi Unloading Auger

The product flow is ensured without any problems with a wider discharge opening and multiple discharge augers.

# BUCKET ELEVATORS

- Manufacturing options up to 500 ton/hour capacities
- Selection of body sheet thicknesses suitable for the capacities
- Manufacturing of standard galvanized sheet for Outdoor projects
- Hot dipped galvanized manufacturing option for port projects
- Painted manufacturing option for under roof projects
- Special Belt selection with bigger Strengths.
- FAG brand, heavy industrial bearings in the head and tail sections
- Entirely bolted installation for easy service and maintenance
- Belt speed sensor
- Explosion vents and safety sensor
- Special rubber coated, head section drum
- PE or Steel buckets
- Reducer motor with Back stop assembly
- Standard belt tensioning system
- Optional Belt alignment sensors
- Optional chain elevator manufacturing

# CHAIN CONVEYORS

- ▶ - Manufacturing options up to 500 ton/hour capacities
- Selection of body sheet thicknesses suitable for the capacities
- Manufacturing of standard galvanized sheet for Outdoor projects
- Hot dipped galvanized manufacturing option for port projects
- Painted manufacturing option for under roof projects
- Special type of chain manufacturing with high elongation and breaking values
- FAG brand, heavy industrial bearings in the head and tail sections
- Entirely bolted installation for easy service and maintenance
- Carrier rolls or slip systems for chain return
- Safety with overflow and chain break sensors
- Special manufacturing chain wear plates
- Optional UHMW PE1000 wear plates
- Optional PE 1000 or HARDOX base plate coatings

# BELT CONVEYORS

- Manufacturing options up to 500 ton/hour capacities
- According to capacities 2l or 3l type design is available
- Selection of body sheet thicknesses suitable for the capacities
- Open or closed type manufacturing is possible according to the requirements
- Standard galvanized sheet manufacturing for Outdoor projects
- Hot dipped galvanized manufacturing option for Port projects
- Painted manufacturing option for under roof projects
- Special Belt for bigger strengths
- FAG brand heavy type industrial bearings in the head and tail sections
- Entirely bolted installation for easy service and maintenance
- Belt breaking off sensor
- Tripper-driven applications are possible for intermediate discharges requirements

MODEL	Efficiency (%)	Belt Speed (m/h)	Body width (mm)	Product Density (kg/m <sup>3</sup> )	Max. Capacity (m <sup>3</sup> /hour)	Max.Capacity (ton/hour)	Capacity Range (t/h)
EVA-BK 300	0,90	2,50	300	800	50	40	30-50
EVA-BK 400	0,90	2,50	400	800	100	80	60-90
EVA-BK 500	0,90	2,50	500	800	150	120	90-140
EVA-BK 600	0,90	2,50	600	800	250	200	140-220
EVA-BK 800	0,90	2,50	800	800	300	240	200-300
EVA-BK 900	0,90	2,50	900	800	500	400	300-400
EVA-BK 1000	0,90	2,50	1000	800	700	560	500-600

## SOLUTIONS UPON CONVEYOR PERFORMANCE

- 1) Impact Bars
- 2) Scraper
- 3) Centroll Auto Centering Roll
- 4) Centroll Centralization Systems
- 5) Air Ball Explosions
- 6) Dublesill Dust Sealing Elements
- 7) Roll Stations
- 8) Band Brushes
- 9) Primer Scraper
- 10) Seconder Scrapers

# SCREW CONVEYORS

- Manufacturing options up to 100 ton/hour capacities
- U or tube type designs are possible according to requirements
- Selection of body sheet thicknesses suitable for the capacities
- Manufacturing from standard galvanized sheets for Outdoor projects
- FAG brand, heavy type industrial bearings in the head and tail sections

## "U" TYPE SCREW CONVEYORS

MODEL	Efficiency (%)	Product Density (kg/m <sup>3</sup> )	Max. Capacity (m <sup>3</sup> /hour)	Max. Capacity (ton/hour)	Screw Diameter (mm)
EVA-THU200	0,45	800	25	20	200
EVA-THU250	0,45	800	50	40	250
EVA-THU300	0,45	800	75	60	300
EVA-THU350	0,45	800	100	80	350
EVA-THU400	0,45	800	125	100	400

## TUBE TYPE SCREW CONVEYOR

MODEL	Efficiency (%)	Product Density (kg/m <sup>3</sup> )	Max. Capacity (m <sup>3</sup> /hour)	Max. Capacity (ton/hour)	Screw Diameter (mm)
EVA-THT200	0,45	800	25	20	200
EVA-THT250	0,45	800	50	40	250

EVA-THT400	0,45	800	125	100	400

# GRAIN FLOW SYSTEMS

In order to providing product flow in conveying systems, flow pipes and directional valves are required.

Pipes in contact with the product usually have wearing problems.

For this reason, the surfaces which come into contact with the product can be made from ST 52, PE, Hardox or Ceramic coatings according to the situation

## Products:

- Manual, Electrical, Pneumatic Slide Gates
- 2 Way Valves
- 3 Way Valves
- 1 Inlet 6 Outlet Distributors
- 2 Inlet 6 Outlet Distributors
- Pipe and Square Type Flow Pipes

# STEEL CONSTRUCTIONS

- Statical Calculated Manufacturing according to Wind Load, Snow Load and Earthquake Factors
- Catwalks Manufacturing
- Elevator Tower Manufacturing
- Grain Receiving and Loading Area Buildings
- Truck, Vagon Loading Bins Platform Manufacturing
- Grain Receiving Pit Grill and Hopper Manufacturing
- All types of steel construction Manufacturing

[www.evasilo.com](http://www.evasilo.com)

# GRAIN DRYING SYSTEMS

SUKUP brand dryers are produced in US

**Advantages compared to other machines are; ROTARY SENSORS for choke fill or demand fill are standard.**

- 1) Rotary sensors for choke fill or demand fill are standard.
- 2) Stainless Steel outer screens, nuts, and bolts resist rust and keep your dryer looking good for years to come.

Perforated Sheets allow air to move easily through the grain, yet retain the bulk of the particulate matter.

- 3) Grain Exchangers move grain from inside of the column to the outside for more even moisture content and consistent grain temperature.

Solid Outer Sheeting in Grain Exchanger Section to maintain balanced heat/air distribution in the plenum and avoid blowing large amounts of particulate matter into the atmosphere.

- 4) Low Pressure Burner is aluminum so holes do not rust shut, giving wide operating temperature range, high fuel efficiency, and low emissions.
- 5) RTD Column Sensor monitors grain temperature at its hottest point in the heat chamber.
- 6) Reducer Cone channels the air from blower(s) evenly past the burner unit.
- 7) Industrial Grade Inline Centrifugal Blowers quietly provide high airflow even with vacuum cooling.

- 8) Leveling Wheels (patented) on paddles ensure consistent grain flow, maximum removal, and keep unload paddles from scraping against the floor.

- 9) Extra-Large Wet Holding Bin features solid sheeting to keep grain dust and particulate matter confined within the dryer.

- 10) 32,4 cm Wide Grain Columns for longer air retention and maximum efficiency.

- 11) Two Clean-Out Doors per panel in grain exchange section allow for easy removal of debris.

- 12) Entry Areas in outer screens and reducer cone allow access to the burner area for easy interior cleaning.

- 13) Louvered Air Vents allow control over the amount of ambient air being pulled through the grain for cooling

- 14) Gearbox requires minimal maintenance since it maintains positive lubrication even with variable speed operation.

- 15) Positive Unloading System uses paddles to evenly sweep grain to the center discharge hopper

Paddles and Grain Table on Unload System are stainless steel for long life

- 16) Pipetrain has Two Standard Safety Shut-Off Valves operated electronically from the touchscreen. The push of a button activates the heater.

## SUKUP DRYERS SPECIFICATIONS

MODEL	U1010	U1510	U1812	U2012	U2412	U3018	U3518	U4018	U4718	U5024	U6024	U7024

EVA Grain Storage Systems, provides this information to assist you in choosing the optimal equipment for your situation. Many factors, such as grain variety, maturity levels, grain cleanliness, weather conditions and operation/management, can affect the performance of your tower dryer and results may vary. This information is calculated and is not a guarantee of product specifications or performance.

\*\*Capacities listed are wet-basis ESTIMATES based on drying principles, field results, and computer simulations at 50°F ambient temperature, 60% humidity, drying a minimum of US #2 Yellow Corn at 220°F average plenum temperature. Variations may occur due to grain kernel size, variety, maturity levels, excessive fines, adverse weather conditions, etc. This information is provided to assist in choosing optimal equipment, it is not a guarantee of dryer performance

## SUKUP QUADRA TOUCH CONTROL SYSTEMS

### ► "EASY START-UP AND OPERATION" "SIMPLE MENU AND DRIVEN SYSTEMS "

The Sukup QuadraTouch™ control system, standard on all Sukup Dryers, was designed to be easy to use with simple menus guiding you through dryer functions. Operator inputs are simple with a pop-up keypad for entering numbers. The QuadraTouch™ can be placed up to 200' away from the dryer using just an Ethernet cable.

THE QuadraTouch™ is a PLC-BASED SYSTEM.

The PLC (Programmable Logic Controller) is a rugged controller built to withstand harsh environments and offer superior electrical noise protection, eliminating nuisance shut downs and providing you with a reliable system.

# GRAIN DRYING SYSTEMS

▶ LAW dryers are produced in France with European standards. Corn, wheat and sensitive products such as Sunflower Seeds, Soybean, Canola are suitable for drying.

## Low Operating Costs;

- Fuel saving is provided by the reason of exhaust air recycling.
- Multiple fuel options. (Gas, Diesel, Steam, Coal, BioMass heater, etc.)
- Low energy consumption.
- Insulated drying chamber and recycling air circuit.
- It has proven technology for more homogeneous drying.
- Easy maintenance.
- Addition of optional pre-cleaning system.

## Safety Operation;

- Operation details are automatically displayed in the dryer control unit.
- After drying, air temperatures are measured and optional fire extinguishing system can be added.
- With the help of a special program, difficult products such as soybean and seed can be dried.
- There is an automatic control system. It is possible to control the machine over the Internet.
- Protect the environment. Due to the filter system there is very little dust emission.
- The motor and fans are in the machine and have low noise, but an optional sound wall can be installed.
- Optional color coating on galvanized sheets.

# GRAIN COOLING SYSTEMS

**FRIGOR TEC**  
Cooling to the point

We are seller of German-made Frigor Brand Grain Cooling Machines.

## Advantages of Grain Cooling Machine;

- It allows the grain to store for very long time without any problems by cooling the grain temperature below 13 degrees and it prevents the pests by cooling.
- You can cool your product in all weather conditions such as high humidity, high humidity, rain, snow, fog.
- The product does not dry your grain because it is cooled with cold and damp (65%) air. The water leading to the air due to ventilation prevents the loss of steam (2-3%). It allows you to get more efficiency from your product. For example, if you vent 10 thousand tons of goods for a long time, the product humidity drops by 2 - 3 points. Ventilation with fans is dry and results in direct weight loss. The total weight of the goods will be reduced by 200-300 tons which is a very serious loss.
- The device targets to cool the grain temperature by 10 degrees and can reduce about 500 tonnes per day (for KK440 model) by 10-13 degrees.
- With the help of a cooler you can store 15 - 16 - 17 moisture of grain and store them for very long time without any problems in combination with your dry products.
- You will end all losses which standard fans have caused by drying their heads.
- You will not need fumigation because the grain temperature level falls down to 10-13 degrees.
- Cooler is mobile so there is no requirement to buy 1 for each silo.
- The Cooler works fully when you press the Start button, there is nothing else to do.

# TEMPERATURE MONITORING SYSTEMS

Our company is dealer of ITG company and authorized for Sales and Service of ITG branded temperature monitoring systems.

ITG is the only company that guarantees the system against design and manufacturing problems for 5 years.

Measuring and monitoring the temperature of the grain during the grain storage process is very important.

As it is known, the grain is exposed to a number of hazards after entering the bin. (Such as loss, mold, germination, etc.). When these conditions occur, the calories and temperature of the grain are released.

When you see the grain temperatures correctly, you mean that you are making the grain storage right and healthy. The nesting dangers among the grains only reveal itself with the rise of temperature. Due to this reason, the function of the Temperature Monitoring System have to be very accurate.

Infotech Group / ITG manufactures Temperature Monitoring Systems, which are unique in the world, all of which are digital, working without any problems for many years.

You can monitor all of these processes of grain stored online and take precautions with ITG Temperature Monitoring Systems,

The most important actor and chief assistant in the process is from the moment the storage process begins until the time of shipment.

Our ITG Temperature Control Systems can be adapted to any kind of bins.

Steel Bins, Flat Storages, Concrete Bins, Bulk Storage

# AIR CANNON SYSTEMS

We solve the bridges problem in bran, feed and ash bins with Air Cannon Systems. Air cannons are used for pneumatic activation of bulk materials in bins and processing plants.

In most cases, the compressed air provided by a standard system will create a sufficient working environment.

Air Cannons operates at an air pressure around 5-6 bar which increases the efficiency.

## Advantages:

- Low energy consumption
- Low Noise Level
- Easy Installation and Operation
- Finishes the Loss of manufacturing and workmanship due to bridge problems
- Minimum operating cost

# DUST COLLECTION SYSTEMS

- ▶ Dust which goes inside the bin with grain may cause many problems during the long time storage. On the other hand dust reduces your capacity inside the bin. It cause too much dust during the truck discharging around your receiving area. Dust collection systems need to be started from grain receiving area. You need to have special grill system to be able to take a good performance from dust collection in receiving area. This special design grills block the dust inside the hopper and allows to make efficient suction. We suggest to make suction from Cleaners and Distributors as well. If you need better dust collection you can also make the suction from Elevators and Conveyors. Cyclone or Jet filter systems are possible according to the requirements

# AUTOMATIC SAMPLING PROBE

It is very important to take samples from different locations of the truck during the grain receiving to be able to make a quick and correct quality analyze.

We have electrical and pneumatically systems.

# TAHIL, UN, YEM VE GIDA

## AM 5800 Manual Grain Moisture Meter

Unique among portable moisture meters, the AM 5800 Manual is based on the same high frequency 150 MHz technology and UGMA algorithm as officially approved meters, including the Perten AM 5200-A.

Drawing on the experience from more than 5,000 installed moisture meters, we have designed a battery operated, portable moisture meter benefitting from the accuracy, repeatability and reliability of the AM 5200-A.

The higher frequency signal provides greater penetration of samples and the UGMA (Unified Grain Moisture Algorithm) provides a more accurate result regardless of moisture level, temperature or crop type. Together these make the AM 5800 Manual the most accurate and repeatable portable moisture meter available. It can analyze grains, oilseeds, pulses, beans, lentils, seeds and more for moisture, Test Weight/Hectoliter Weight, and temperature with the same calibrations as the officially approved AM 5200-A.

## AM 5200 Grain Moisture Tester

**Second Generation 150 MHz Technology - Moisture and Hectoliter Weight/ Test Weight in 10 seconds.**

The AM 5200 is Perten's second-generation high frequency moisture meter. Drawing on the experience from more than 5,000 installed units, we have designed a moisture meter improved in every aspect – accuracy, repeatability, reliability, and user interface. It can be a stand-alone moisture meter for use at terminals or can be integrated into automated testing systems

Higher frequencies provide greater penetration of samples; the updated UGMA provides a more accurate result regardless of temperature or crop type; the improved mechanism provides better repeatability. Together this make the AM 5200 the most accurate and repeatable moisture meter available. It can analyze grains, oilseeds, pulses, beans, lentils, seeds and more for moisture, Test Weight/Hectoliter Weight, and temperature.

### Features and benefits:

- **Superior accuracy** : Save money by paying the right price for the grain you buy.
- **Moisture and Specific Weight** : Save time with one instrument for two measurements.
- **10-second analysis** : Save time and cost.
- **Touch screen operation** : Easier to use with fewer mistakes.

## ▶ INFRAMATIC 8800 NIR Grain Analyzer

IM 8800 is the next generation portable NIR instrument for protein, moisture and oil determination in grain and oilseed.

The instrument has been designed with portability in mind to give users freedom to measure grain in-field, at grain storage sites and at grain processing locations. Equipped with GPS enables point specific sampling to generate protein maps on-the-go to make informed harvesting and binning decisions.

With uncompromising quality and build standards the instrument provides you with highly accurate data which you can rely on.

## ▶ DA 7300 In-line NIR Sensor

The DA 7300 In-line NIR Analyzer is an advanced, modern NIR analyzer for use in Grain, Flour, Food and Feed processing.

It provides real-time information about the product as it is produced. Immediate access to this information, without having to wait for laboratory measurements, provides a number of advantages:

- Enables automatic process control
- Allows immediate manual intervention.
- Faster start-up and grade changes
- Complete traceability of the entire manufacturing

## ▶ DA 7440 On-line NIR

The DA 7440 is an advanced, modern and versatile on-line NIR sensor for over-the-belt type measurements. It performs real-time multi-constituent measurements of a product on a processing line providing information for process control and quality monitoring.

Continuous process monitoring helps users to increase efficiency and reduce scrap and re-work while improving product consistency and quality. The instrument performs simultaneous measurement of parameters such as moisture, fat, sugars, protein, starch, fiber and many others. The core diode array technology provides many benefits including durability, stability, accurate measurement of moving products and the ability to track process changes
